

# Uploading images from gallery

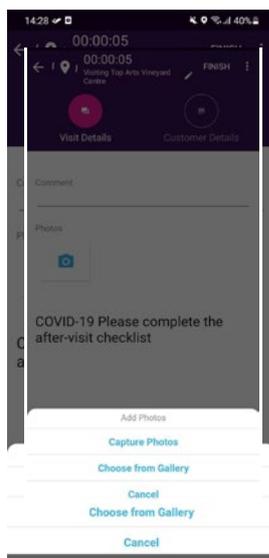

## How is this feature going to help you?

Field users can now easily upload images from their mobile device to their order, visit and other forms

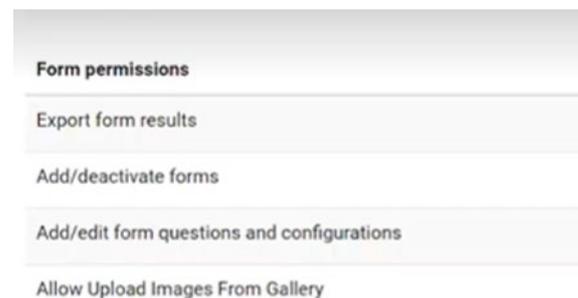

### How does it work?

- The manager/account manager user needs to ensure that the permission is allowed
- Once the permission is allowed when a field user selects the option to capture a photo, two options will be visible, they can then select to capture a live photo or select the option to upload

### Access the field user role and scroll to the Forms Permission

Once the permission is granted, the field user will now be able to select from the options available.

This will be visible on

1. Visit forms
2. Order/Quote/Credit Request forms
3. Any form where capturing an image/photo is required

### **Please note:**

*There are no limits when adding multiple images. We should highlight that if you add lots of images, it can take some time to sync them with the back office for your manager.*
